In Re: Patent Term Extension
Application for
U.S. Patent No. 5,654,301

NOTICE OF FINAL DETERMINATION

A determination has been made that U.S. Patent No. 5,654,301, which claims the human drug product VIMPAT® (lacosamide) Injection and a method of using the human drug product VIMPAT® (lacosamide) Injection, is eligible for patent term extension under 35 U.S.C. § 156. The period of extension has been determined to be 5 years.

A single request for reconsideration of this final determination as to the length of extension of the term of the patent may be made if filed within one month of the date of this notice. Extensions of time under 37 CFR § 1.136(a) are not applicable to this time period.

Applicant also has applied for patent term extension of U.S. Patent No. RE38551 based on the regulatory review period for NDA 22-254, VIMPAT® (lacosamide) Injection.

When patent term extension applications are filed for extension of the terms of different patents based upon the same regulatory review period for a product, the certificate of extension is issued to the patent having the earliest date of issuance unless applicant elects a different patent. In the absence of an election by applicant within one month of the date of this notice, and in accordance with 37 CFR 1.785(b), the application for patent term extension in U.S. Patent No. RE38551 will be denied. Accordingly, the application for patent term extension of the patent having the earlier date of issuance will be granted. A certificate of extension will be issued to U.S. Patent No. 5,654,301. In the absence of such request for reconsideration of the present term extension, and if U.S. Patent No. 5,654,301 is elected, the Director will issue to the applicant a certificate of extension, under seal, for a period of 5 years, in U.S. Patent No. 5,654,301.

The period of extension, if calculated using the Food and Drug Administration determination of the length of the regulatory review period published in the Federal Register of April 23, 2010 (75 Fed. Reg. 21298), would be 1,925 days. Under 35 U.S.C. § 156(c):

$$\text{Period of Extension} = \text{RRP} - \text{PGRRP} - \text{DD} - \tfrac{1}{2}(\text{TP} - \text{PGTP})^{1}$$

[1] Consistent with 35 U.S.C. § 156(c), "RRP" is the total number of days in the regulatory review period, "PGRRP" is the number of days of the RRP which were on and before the date on which the patent issued, "DD" is the number of days of the RRP that the applicant did not act with due diligence, "TP" is the testing phase period described in paragraphs (1)(B)(i), (2)(B)(i), (3)(B)(i), (4)(B)(i), and (5)(B)(i) of subsection (g) of 35 U.S.C. § 156, and "PGTP" is the number of days of the TP which were on and before the date on which the patent issued, wherein half

= 3,452 days- 0 - 0 - ½ (3,055)
= 1,925 days (5.3 years)

Since the regulatory review period began May 19, 1999, after the patent issued August 5, 1997), the entire regulatory review period has been considered in the above determination of the length of the extension period 35 U.S.C. § 156(c). No determination of a lack of due diligence under 35 U.S.C. § 156(c)(1) was made.

The five year limitation of 35 U.S.C. § 156(g)(6)(A) applies in the present situation because the patent was issued after the date of enactment of 35 U.S.C. § 156. Since the period of extension calculated under 35 U.S.C. § 156(c) for the patent cannot exceed five years under 35 U.S.C. § 156(g)(6)(A), the period of extension will be for five years.

The 14 year limitation of 35 U.S.C. § 156(c)(3) does not operate to further reduce the period of extension determined above.

Upon issuance of the certificate of extension, the following information will be published in the Official Gazette:

U.S. Patent No.:	5,654,301
Granted:	August 5, 1997
Original Expiration Date[2]:	August 5, 2014
Applicant:	Harold Kohn et al.
Owner of Record:	Research Corporation Technologies Inc.
Title:	Amino Acid Derivative Anticonvulsant
Product Trade Name:	VIMPAT® (lacosamide) Injection
Term Extended:	5 years
Expiration Date of Extension:	August 5, 2019

---

days are ignored for purposes of the subtraction of ½ (TP - PGTP).

[2]Subject to the provisions of 35 U.S.C. § 41(b).
